

1. Було створено акаунт AWS, та верифіковано його, показано на рисунку 1.

## Sign up for AWS

### Root user email address

Used for account recovery and as described in the [AWS Privacy Notice](#)

marimay228@gmail.com

### AWS account name

Choose a name for your account. You can change this name in your account settings after you sign up.

mari may

**Verify email address**

Рисунок 1- реєстрація в AWS

2. Було створено S3 бакет, показано на рисунку 2.

**General configuration**

**AWS Region**  
Europe (Stockholm) eu-north-1

**Bucket type** [Info](#)

**General purpose**  
Recommended for most use cases and access patterns. General purpose buckets are the original S3 bucket type. They allow a mix of storage classes that redundantly store objects across multiple Availability Zones.

**Directory**  
Recommended for low-latency use cases. These buckets use only the S3 Express One Zone storage class, which provides faster processing of data within a single Availability Zone.

**Bucket name** [Info](#)  
viazinko-bucket-apz

Bucket names must be 3 to 63 characters and unique within the global namespace. Bucket names must also begin and end with a letter or number. Valid characters are a-z, 0-9, periods (.), and hyphens (-). [Learn more](#)

**Copy settings from existing bucket - optional**  
Only the bucket settings in the following configuration are copied.  
[Choose bucket](#)

Format: s3://bucket/prefix

**Object Ownership** [Info](#)

Control ownership of objects written to this bucket from other AWS accounts and the use of access control lists (ACLs). Object ownership determines who can specify access to objects.

**Object Ownership**

**ACLs disabled (recommended)**  
All objects in this bucket are owned by this account. Access to this bucket and its objects is specified using only policies.

**ACLs enabled**  
Objects in this bucket can be owned by other AWS accounts. Access to this bucket and its objects can be specified using ACLs.

Рисунок 2- створений бакет

3. До бакету було додано створений html файл, та виконано налаштування хостингу, показано на рисунку 3.

The screenshot shows the AWS S3 'Upload' interface. At the top, there's a search bar and navigation links for 'Amazon S3 > Buckets > viazinko-bucket-apz > Upload'. The main area is titled 'Upload' with a sub-section 'Info'. It says 'Add the files and folders you want to upload to S3. To upload a file larger than 160GB, use the AWS CLI, AWS SDKs or Amazon S3 REST API. Learn more' and includes a 'Drag and drop files and folders you want to upload here, or choose Add files or Add folder.' button. Below this is a table titled 'Files and folders (1 total, 227.0 B)' containing one item: 'index.html' (text/html, 227.0 B). There are buttons for 'Remove', 'Add files', and 'Add folder'. The 'Destination' section shows 's3://viazinko-bucket-apz' and a 'Destination details' link. The bottom navigation bar includes CloudShell, Feedback, Console Mobile App, Privacy, Terms, and Cookie preferences.
